

General feedback for android and iphone

ALL VIEWS:

I'd like to get the message boxes closer to what has been provided.

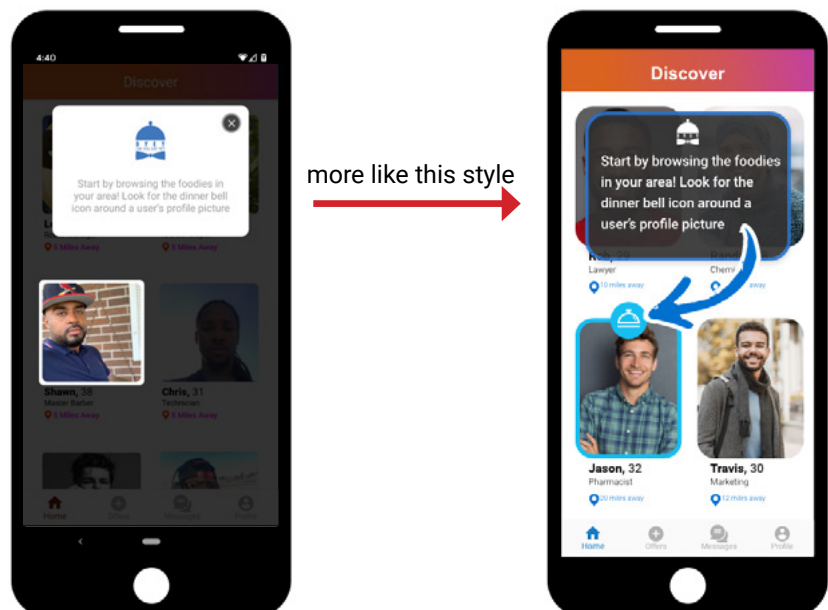

1. Dark background (semi-transparent)
2. White letters
3. Blue or gray outline around box

Please be sure message prompts are not missing words. (proof read)

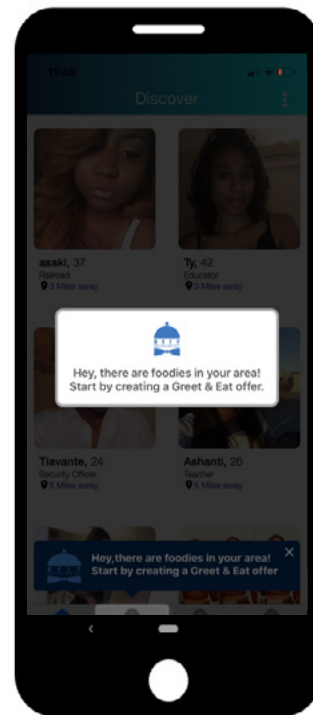

DINNER BELL VIEW

Add a blue box and dinner icon around a guys image so the user know what to look for

Feedback for iphone

On my home screen I had two pop up messages saying the same thing. Looks like they never deleted the original one as I prefer the one at the bottom more

Notice the how the logo is a bit pixelated/ warped where you can't clearly read it. Not a huge deal but I wonder can they get it a little crisper

Also notice the color change of the pop up box background and logo it's not consistent throughout. This should match the style of the android app

Lastly, there is no way to view, or delete my current ID photos front and back. I get it we want people to upload this but they also have the right to delete it should they want to
