

Courier Service App

3rd February 2021

OVERVIEW

The App Kit have been asked to provide costs for the development of a courier booking app in Lagos. Intention of this app is to provide users a platform they can sign up to, and book courier services on. There is also the requirement of a driver app that will allow the delivery drivers to know the deliveries that have been assigned to them, along with where they need to route to; to pick up and drop off the deliveries.

DELIVERABLES

1. User Flow and Prototype Design

- Includes UX time to develop the user flow within the app
- Includes designer time to create an XD prototype that will work to demonstrate the look and feel of the apps

2.iOS & Android Apps

A courier service driver & customer app, built on both iOS & Android, and provides users with the following functionality:

Driver app

- o Driver log in (registration managed manually through the admin panel)
- o View and set the status of allocated jobs (manually allocated through the admin panel)
- o Able to link out to Google Maps to provide the routes to each, the pick up point and the delivery point

Customer app

- o Login & sign up
- o Wallet (for saved cards)
- o Make a booking (up to 1 week in advance)
- o View pending bookings (basic fixed status of booking can be viewed)
